

FACOM DPF cleaner 475ml

EAN: 3221320060223

SKU: 006022

FACOM particle filter cleaner 475ml, prevents the obstruction of Diesel Particulate Filters (DPF) and re-establishes effective operation of the catalyst due to soot retained inside. Prolongs the life of the DPF and reduces the need for a costly and early replacement. No disassembly needed. Does not affect the composition of the DPF and catalyser. Preventative use every 15000 kilometers (10000 miles), or use as a cure when the anti-pollution indicator comes on, before complete obstruction of the DPF and triggering of the defect mode. To be poured into the diesel fuel tank, this bottle treats 50 - 70 litres of fuel
